

CONTENTS

EXECUTIVE SUMMARY	i
RECOMMENDATIONS	ii
AIMS	1
1. STRUCTURAL FEATURES	2
1.1 STRATIGRAPHY	2
1.1.1. The Fortescue Group	2
1.1.2. The Hamersley Group	2
1.2 GAMMA LOGGING	4
1.3 GEOLOGY OF THE MINE	4
1.4 STRUCTURAL FEATURES	5
1.4.1. Bedding	5
1.4.2. Cleavage	7
1.4.3. Faults	7
1.4.4. Joints	10
1.4.5. Striations	10
1.5 GEOMECHANICAL IMPORTANCE OF FIRST-ORDER STRUCTURAL FEATURES	11
1.5.1 Faults	11
1.5.2 Unit Contacts	12
1.5.3 Units of low strength	13
1.5.4. '320' faults and unfavourable bedding orientations	13
1.6 RECOMMENDATIONS	14
2. THE STRUCTURAL MODEL	15
2.1 METHODOLOGY	15
2.1.1 Phase 1	15
2.1.2 Phase 2	15
2.2 EXISTING INFORMATION	16
2.2.1. Surface Mapping	16
2.2.2. Cross-section and drill hole information	16
2.2.3. The geotechnical database	17
2.2.4. Summary	17
2.3 GENERAL MODEL ASSUMPTIONS	17

2.4 THE SIX CROSS – SECTIONS	19
2.4.1. Section 319 000 E	19
2.4.2. Section 318 000 E	20
2.4.3. Section 317 000 E	20
2.4.4. Section 316 000 E	21
2.4.5. Section 315 000 E	21
2.4.6. Section 314 320 E	21
2.5 LEVELS OF CONFIDENCE	22
2.6 RECOMMENDATIONS	22
3.0 <i>IN-SITU</i> STRESS	24
3.1 THE REGIONAL STRESS FIELD	24
3.2 THE HYDROFRACTURE TECHNIQUE	24
3.3 HYDROFRACTURE TESTS AT MT WHALEBACK	25
3.3.1 D314	25
3.3.2 D315	25
3.4 DISCUSSION OF HYDROFRACTURE TESTS	25
3.4.1 D314	25
3.4.2 D315	25
3.5 POTENTIAL WEAKNESSES	26
3.5.1 D314	26
3.5.2 D315	26
3.5.3 General results	26
3.6 RECOMMENDATIONS	27

APPENDICES

A STRUCTURAL MEASUREMENTS

B STRUCTURAL LOGGING OF DIAMOND TAIL DT3

C DRILLING RESULTS

D REPORT ON THE STATE OF CONTEMPORARY STRESS IN THE PILBARA.

FIGURES

	<i>After Page</i>
1.1 Regional stratigraphic and tectonic subdivisions for the southern Pilbara margin.	2
1.2 Composite gamma log for Mt Whaleback Mine.	3
1.3 Composite gamma log for Marra Mamba Iron Formation & part of Wittenoom Formation.	3
1.4 Outline of open pit.	4
1.5 Regional outcrop map of Mt Whaleback area showing location of major folds.	4
1.6 Typical cross-section through Mt Whaleback Mine (6720 E).	4
1.7 Main faults and major F ₂ folds at Mt Whaleback Mine.	4
1.8 Mt Whaleback cross-section 315120 E showing ore-enrichment boundaries.	4
1.9 S ₀ at Mt Whaleback.	5
1.10 Average fold trends in the Mt Whaleback area determined from S ₀ and S ₂ best-fit small- and great-circles.	5
1.11 F ₃ fold at Mt Whaleback Mine.	5
1.12 F ₄ fold at Mt Whaleback Mine.	5
1.13 S ₂ cleavage at Mt Whaleback Mine.	7
1.14 S ₂ cleavage in Jeerinah Shale delineating an F ₃ fold.	7
1.15 Minor faults at Mt Whaleback Mine.	9
1.16 Joints developed at Mt Whaleback Mine	10
1.17 Recent joints developed in West Pit.	10
1.18 'Fault-striation' diagram for striations measured in diamond core DT3.	10
1.19 'Fault-striation' diagram for striation measured in Jeerinah Dolerite	10
1.20 'Fault-striation' diagram for striations measured on mesoscopic F ₂ folds at Mt Whaleback Mine.	10
1.21 'Fault-striation' diagram for striations measured within the Whaleback Fault Zone.	10
2.1 Geological legend for six cross-sections.	19
2.2 Section 319000 E.	19
2.3 Section 318000 E	19
2.4 Section 317000 E	19
2.5 Section 316000 E.	19
2.6 Section 315000 E.	19
2.7 Section 314320 E	19

3.1 Basic elements of the hydrofracture technique.	24
3.2 Outline of open pit, showing location of stress measurement holes, D314 & D315.	25
3.3 3-D Mohr-circle diagram for stress measurements performed in D314.	26
3.4 3-D Mohr-circle diagram for the two most reliable stress measurements performed in the top of hole D315.	26
3.5 3-D Mohr-circle diagram for stress measurements performed in the bottom of hole D315.	26
3.6 Stereonet showing orientations for which reactivation of existing planes is favourable.	26
3.7 Overlapping diagrams of S_0 , S_2 and minor faults with zones of instability.	26

Appendix Figures

B.1 S_0 measurements in drill core DT3	B1
B.2 Joints, shears and fractures measured in drill core DT3	B1
C.1 Outline of open pit showing location of drillholes BA1, BA2 & BA3.	C1
C.2 Correlated logs for drillholes BA1, BA2 & BA3.	C3

TABLES

	<i>Page</i>
1.1 Standard thicknesses for stratigraphic units in the Mt Whaleback area.	2
1.2 Structural elements of the SE Hamersley Province.	4
2.1 Classification of the level of detail for mine-area cross-sections.	17
3.1 Summary of stress analysis for D314 & D315.	24

Appendix Tables

B.1 Structural data collected from DT3	B1
C.1 Results of drillhole BA1	C1
C.2 Results of drillhole BA2	C2
C.3 Results of drillhole BA3	C3
