

TABLE OF CONTENTS

INTRODUCTION	1
<hr/>	
PART 1 Thin Spray-on Liners (TSLs) — A Quick Reference Guide	3
SECTION 1 <i>Brief History of Thin Spray-on Liners</i>	5
SECTION 2 <i>Thin Spray-on Liner Products</i>	7
2.1 Introduction	7
2.2 Desirable TSL Properties	7
2.3 TSL Material Chemistry	8
2.4 Material Handling	8
2.5 TSL Products	9
2.6 TSL Product List	11
2.7 Future Product Development	11
SECTION 3 <i>Occupational Health and Safety</i>	13
3.1 Flammability	13
3.2 Reactivity	14
3.3 Toxicity and Physiological Effects	14
SECTION 4 <i>Testing Methods</i>	17
4.1 Introduction	17
4.2 Mechanism of Support Action and Loading Behaviour of Thin Spray-on Liners	22
4.3 Testing Methods that have been used for TSLs	22
4.3.1 Material testing	23
4.3.2 “Representative” testing	24
4.4 Discussion	24
4.5 Data Sheets (DS) on Testing Methods	26
SECTION 5 <i>Field Trials and Applications</i>	39
<hr/>	
PART 2 International Seminars on Surface Support — Proceedings	45
SECTION 6 <i>THIN SPRAY-ON LINERS</i>	47
SECTION 6.1 <i>Design</i>	49
CHAPTER 1 Thin spray-on liners for underground rock support – testing and design issues. D.D. Tannant, University of Alberta	51
CHAPTER 2 Comparison of support requirement performance characteristics of sprayed-cementitious coatings. A.R. Leach, Itasca Africa (Pty) Ltd.	61
CHAPTER 3 Towards a rational design methodology for thin spray-on liners. J. Hadjigeorgiou and M. Grenon, Laval University.	65
SECTION 6.2 <i>Testing of Thin Spray-on Liner Properties and Behaviour</i>	71
CHAPTER 4 Canadian laboratory and field testing. J.F. Archibald, Queen’s University.	73
CHAPTER 5 Thin spray-on liner tests. D.J. Finn, WMC Resources Ltd, St Ives Gold.	89
CHAPTER 6 The effective testing of thin spray-on liners (Superskins) for use in underground mines. A.J.S. Spearing, Master Builders Technologies; J. Ohler and E. Attiogbe, Master Builders Inc.	97
CHAPTER 7 Evaluation of thin spray-on liners support behaviour. J.S. Kuijpers, CSIR Miningtek.	103
CHAPTER 8 Model of TSL behaviour under punch-through conditions. J.S. Kuijpers and A.Z. Topper, CSIR Miningtek.	113

CHAPTER 9	Comparative performance testing of ultra-thin structural liners. W.A. Naismith, AngloGold South Africa; N.R. Steward, NS Consultancy.	119
CHAPTER 10	Evaluation of test methods for measuring adhesion between a liner and rock. D.D. Tannant and H. Ozturk, University of Alberta.	125
CHAPTER 11	Influence of rock properties and environmental conditions on adhesive bond to a thin liner. H. Ozturk and D.D. Tannant, University of Alberta.	135
CHAPTER 12	Torque testing of thin spray-on liner coated cores. H. Yilmaz (a), S. Saydam (a&b), D. Henderson (c). University of the Witwatersrand, Johannesburg (a&c), Dokuz Eylul University (b).	141
CHAPTER 13	Results from the testing of TSLs using a simple, low cost laboratory test. T.R. Stacey and M. Kasangula Kiboko, University of the Witwatersrand.	147
CHAPTER 14	A new testing approach for thin spray-on liners: double-sided shear strength (DSS) test. S. Saydam (a&b), H. Yilmaz (a), T.R. Stacey (a). University of the Witwatersrand (a); Dokuz Eylul University (b).	151
CHAPTER 15	The long-term performance of surface support liners for ground control in an underground limestone mine. D.M. Pappas, T.M. Barton and E.S. Weiss, National Institute for Occupational Safety and Health.	157
SECTION 6.3 Testing Thin Spray-on Liners for Rockbursting Conditions		167
CHAPTER 16	Rockburst damage mitigation benefits deriving from use of spray-on rock linings. J.F. Archibald, J.P. Baidoe and P.T. Katsabanis, Queen's University.	169
CHAPTER 17	Comparative assessment of conventional support systems and spray-on rock linings in a rockburst prone environment. J.F. Archibald, J.P. Baidoe and P.T. Katsabanis, Queen's University.	179
CHAPTER 18	Assessment of the dynamic capacity of liners for possible application in highly-stressed mining environment at Inco Limited. S.J. Espley and L.H. Moreau, Inco Limited; J. Heilig, Blastronics Limited.	187
CHAPTER 19	Recent investigations into thin spray-on liner support systems at Inco. L.H. Moreau (a), S.J. Espley (b) and W.S. Dunbar (c). University of British Columbia (a & c); Inco Limited (b).	193
SECTION 6.4 Field Trials and Applications		203
CHAPTER 20	Thin spray-on liner research and field trials at Inco. S.J. Espley, R. Gustas and L.H. Moreau, Inco Limited; J. Heilig, Blastronics Limited.	205
CHAPTER 21	Water-based spray-on liner implementation at Falconbridge Limited. G. Swan and A. Henderson, Falconbridge Limited.	215
CHAPTER 22	Technical and business case arguments supporting the development of a TSL mining system. G. Swan (a), P. Fantin (a), G. Doyle (b), S.A. Mikalachki (b), B. Martin (c), R.K. Brummer (d). Falconbridge Limited (a); 3M Canada (b); Sandvik-Tamrock Canada (c); Itasca Consulting Canada Inc. (d).	221
CHAPTER 23	TSL trials at an Australian underground coal mine. D.C. Laurence, University of New South Wales.	227
CHAPTER 24	Tekflex®—new areas of application. R.W. Hawker, Minova Australia.	235
CHAPTER 25	Minova resin spray field trials—Neves Corvo Mine, Portugal. N. Hepworth, Palabora Mining Company; J. Lobato, Neves Corvo Mine.	239
SECTION 7 Shotcrete		243
SECTION 7.1 Shotcrete Technology		245
CHAPTER 26	Shotcrete in mines: state-of-the-art in South Africa. T.R. Stacey, University of the Witwatersrand.	247
CHAPTER 27	Shotcrete rock support in Australian mines: state-of-the-art. C.R. Windsor, Western Australian School of Mines.	255
CHAPTER 28	Understanding wet-mix shotcrete, mix design, specifications and placement. M. Jolin and D. Beaupré, Laval University.	263
CHAPTER 29	Recent developments with the use of fibres in sprayed concrete. A.J.S. Spearing, J.T. Champa and B.S. Hulvey, Degussa Construction Chemicals.	267

CHAPTER 30	Large scale tests on synthetic fibre reinforced shotcrete. M. Van Sint Jan (a), A.G. Bonani (b), B.V. Escobar (c). Pontificia Universidad Católica de Chile (a); Codelco Chile (b); Grace Química Cía. Ltda (c).	271
CHAPTER 31	The use of engineered cements in thin section support systems for water sensitive strata. D.O. Reynolds, Ardex U.K. Ltd.; A.R. Leach, Itasca Africa (Pty) Ltd.	277
CHAPTER 32	The importance of rock surface preparation in shotcreting operations. M.E. Kuchta, Colorado School of Mines; W.A. Hustrulid, University of Utah; L.J. Lorig, Itasca Chile S.A.	283
CHAPTER 33	Current shotcrete testing at Inco – research into enhanced mix design and support design. R.C. Whipple, Inco Limited; C.J. Banton, Queen’s University; M.S. Diederichs, Queen’s University.	291
SECTION 7.2 Mine Site Applications		299
CHAPTER 34	Inco’s experience with shotcrete for ground support. S.J. Espley, F. Malek and J.P. D. O’Donnell Sr., Inco Limited.	301
CHAPTER 35	Shotcrete in rockbursting conditions. C.C. Langille, Northwind Enterprises Pty Ltd.	313
CHAPTER 36	Shotcrete usage at Brunswick Mine, Canada. D. Gaudreau, J. Sonier, D. Black, L. Joncas and R. Caza, Noranda Inc. Brunswick Mine.	327
CHAPTER 37	Shotcrete at Northparkes Mines – Performance, learnings and future applications. S.B. Duffield, Rio Tinto Northparkes Mine.	335
CHAPTER 38	Becoming thick skinned. Black Swan’s experience with shotcrete. D.A. McGowan, Outokumpu Mining, Black Swan Nickel Mine.	341
CHAPTER 39	Development and testing of a high energy absorbing ground support system for squeezing ground conditions – WMC Leinster Nickel Operations. D.B. Tyler, T. Williams, L. O’Connor, WMC Resources Ltd; C.C. Langille, Northwind Enterprises; Matthew Clements, Grenz Consulting Pty Ltd.	345
CHAPTER 40	Steel-fibre reinforced shotcrete as a secondary support medium. M.J. Watt, S.Z. Pethö and C.F. Dalton, Placer Dome Western Areas Joint Venture.	353
SECTION 7.3 Orepass Lining		363
CHAPTER 41	The case for liners in orepass systems. J. Hadjigeorgiou and J-F. Lessard, Laval University.	365
CHAPTER 42	Orepass rehabilitation – a case study at Elandsrand Gold Mine. W. Osae, Harmony Gold Mine; J.A.J. De Lange, Brentley, Lucas and Associates.	373
CHAPTER 43	Improving the longevity of an orepass. B. O’Hearn, Lafarge Canada Inc.; G. Somers, Lafarge South Africa.	379
SECTION 8 Mesh		383
CHAPTER 44	Weld mesh for rock support in Australia. E. Villaescusa, Western Australian School of Mines.	385
CHAPTER 45	Rock support action of mesh quantified by testing and analysis. A.G. Thompson, Western Australian School of Mines.	391
CHAPTER 46	Load capacity and stiffness of welded wire, chain link, and expanded metal mesh. D.D. Tannant, University of Alberta.	399
CHAPTER 47	The capacities of various types of wire mesh under dynamic loading and the contribution of wire rope lacing in surface support. T.R. Stacey, University of the Witwatersrand; W.D. Ortlepp, SRK Consulting.	403
CHAPTER 48	The performance of yielding tunnel support systems under dynamic loading. W.D. Ortlepp and A.H. Swart, SRK Consulting; P.N. Erasmus, Grinaker Duraset Mining.	409
