Paste 2006

Proceedings of the Ninth International Seminar on Paste and Thickened Tailings, 3–7 April 2006, Limerick, Ireland

PASTE 2006 PROCEEDINGS

The Industrial Centre of Particle Science & Engineering of the University of Leeds, Golder Associates (UK) Limited and Dorr-Oliver Eimco hosted the Ninth International Seminar on Paste and Thickened Tailings – Paste 2006, in Limerick Ireland, April 3 to 7, 2006. This seminar focused on the latest innovations and advancements in the preparation, transportation and disposal of paste and thickened tailings in a safe and environmentally sound way. The objective of the seminar was to allow academics, designers, practitioners, consultants and suppliers to exchange knowledge, experiences and lessons learnt in different case studies and projects around the world.

Paste 2006 brought together top operators and technology developers to share their experiences. Companies and all participants interested or involved in paste technology had the opportunity to share information about innovative strategies and processes to help maintain a comprehensive advantage.

Content

- Thickening
- Rheology and Thickening
- Surface Disposal
- Mine Backfill
- Transport Issues

These proceedings provide essential reading for anyone considering the application of paste and thickened tailings to both new and existing projects. Please contact the ACG to obtain copies of the proceedings of previous International Paste Seminars (Paste 2000 to Paste 2005). These proceedings are a hard bound black and white publication comprising 443 pages.

Purchase this publication, or individual papers, from our online shop: www.acg.uwa.edu.au/shop

The ACG acknowledges the contribution of the committees and paper reviewers to the development of this publication.
