Mine Closure 2006

Proceedings of the Second International Seminar on Mine Closure
13–15 September 2006, Perth, Western Australia

MINE CLOSURE 2006 PROCEEDINGS

The Australian Centre for Geomechanics and the Centre for Land Rehabilitation, The University of Western Australia, hosted the First International Seminar on Mine Closure – Mine Closure 2006, in Perth, Western Australia, September 13 to 15, 2006.

This seminar focused on the exchange of ideas, knowledge and lessons learnt in mine closure activities. In today's highly competitive and environmentally accountable world the exchange of knowledge is a necessity. Mine Closure 2006 brought together top mine owners and operators, consultants, legislators, service providers and researchers to share information about innovative mine closure strategies, processes and products to help minimise future environmental and social impacts. By using opportunities such as this for setting the agenda for future research and operational directions, the viability of mining operations can be ensured.

CONTENT

- Planning for Closure
- Ecosystem Reconstruction and Pedogenesis
- Hydrology of Post-Mining Landscapes
- Financing Closure
- Landform Stability
- Contaminant Risks and Off-Site Impacts
- Success Criteria
- Social Impacts

These proceedings provide essential reading for anyone involved in mine closure projects and are a soft bound black and white publication comprising 846 pages.
