# Paste 2007

## Proceedings of the Tenth International Seminar on Paste and Thickened Tailings, 13–15 March 2007, Perth, Australia

### PASTE 2007 PROCEEDINGS

The Australian Centre for Geomechanics was delighted to host the Paste07 Seminar. The proceedings cover all aspects of paste and thickened tailings, from preparation through to surface and underground disposal. Paste07 also addressed the important part that this advancing technology plays in incremental rehabilitation and its impact on mine closure.

These proceedings are a hard bound black and white publication featuring 40 papers comprising 436 pages.

#### Content

- Thickening
- Mine Backfill
- Transport
- Rheology
- Surface Disposal
- Operational Experiences
- Emerging Issues

### 2007 RHEOLOGY WORKSHOP PROCEEDINGS

The pre-seminar rheology workshop tackled the complexities of paste preparation and the resulting rheology. The workshop proceedings will assist readers to understand how slurry operations and minerals processing benefit from rheology practice. Content: rheological principles, flocculants, design parameters and thickener selection, effect of flocculation and preparation on rheology and case studies.

These proceedings provide essential reading for anyone considering the application of paste and thickened tailings to both new and existing projects.
