Table of Contents

1  Keynote Address: Progress and challenges in some areas of deep mining
   E.T. Brown, Golder Associates Pty Ltd, Australia

Ground support

27  Validating a support performance database based on passive monitoring data
    P. Morissette, J. Hadjigeorgiou, Lassonde Institute of Mining, University of Toronto, Canada; D. Thibodeau, Mines and Mill
    Technical Services, Vale Ltd., Canada

41  Functional specifications for in-stope support based on seismic and rockburst observations in South African mines
    R.J. Durrheim, CSIR Centre for Mining Innovation; and University of the Witwatersrand, South Africa

57  Performance of dynamic support system in highly burst-prone ground conditions at Vale’s Copper Cliff Mine – a case study
    D.R. Chinnasane, M. Yao, D. Landry, P. Paradis-Sokoloski, Vale Canada, Canada

71  Progress with empirical performance charting for confident selection of ground support in seismic conditions
    P.A. Mikula, Mikula Geotechnics Pty Ltd, Australia

91  Mechanisms of rockbolt support in jointed rock masses
    T. Moyo, University of the Witwatersrand, South Africa; and Xstrata Zinc, Australia; T.R. Stacey, University of the
    Witwatersrand, South Africa

105 A study of the behaviour of fully grouted rockbolts subjected to dynamic loading in underground mining
    A. Mortazavi, F. Tabatabae Alavi, Department of Mining and Metallurgical Engineering, Amirkabir University of
    Technology, Iran

117 Use of Yield-Lok bolts as conveyor belt hanging system in seismic areas
    Y.K. Wu, Barrick Gold Corporation, Canada; R. Gagnon, Jennmar of Canada Inc., Canada

Seismic monitoring

129  Keynote Address: Managing seismicity at the Tasmania Mine
    P.B. Hills, BCD Resources (Operations) NL, Australia

149 Beyond coloured balls – making sense of large volumes of microseismic data with diverse source mechanisms
    W. de Beer, Golder Associates (NZ) Ltd, New Zealand; J.A. Ardito, MINSUR S.A., Peru; J-P. Mercier, Golder Associates Ltd.,
    Canada; and Advanced Geosciences Imaging Solutions Ltd., Canada; V. Falmagne, Golder Associates Ltd., Canada

161 Discrimination of blasts in mine seismology
    D. Malovichko, Institute of Mine Seismology, Australia

173 Establishment of SATREPS experimental sites in South African gold mines to monitor phenomena associated with
    earthquake nucleation and rupture
    R.J. Durrheim, SATREPS, CSIR Centre for Mining Innovation, South Africa; and University of the Witwatersrand, South
    Africa; H. Ogasaowara, SATREPS, Ritsumeikan University, Japan; M. Nakatani, SATREPS, Earthquake Research Institute,
    Tokyo University, Japan; Y. Yabe, SATREPS, Tohoku University, Japan; H. Kawakata, SATREPS, Ritsumeikan University,
    Japan; M. Naoi, SATREPS, Tokyo University, Japan; A.K. Ward, First Uranium, South Africa; S.K. Murphy, AngloGold
    Ashanti, South Africa; I. Wienand, KDC Goldfields, South Africa; P. Lenegan, Goldfields, South Africa; A.M. Milev, SATREPS,
    CSIR Centre for Mining Innovation, South Africa; O. Murakami, SATREPS, Ritsumeikan University, Japan; N. Yoshimitsu,
    Ritsumeikan University, Japan; T. Kgarume, SATREPS, CSIR Centre for Mining Innovation, South Africa; A. Cichowicz,
    SATREPS, Council for Geoscience, South Africa
189  Shear slip indication at Big Gossan Mine  
H. Arbi, E. Riyanto, R. Rabbani, L. Meiharrik, PT Freeport Indonesia, Indonesia

201  Active seismic monitoring  
R.A. Lynch, Institute of Mine Seismology, Australia

211  Kanowna Belle – evolution of seismicity with increasing depth in an ageing mine  
R. Varden, H. Esterhuizen, Barrick Kanowna Ltd, Australia

Stress and structures

231  An investigation of the effects of joint roughness on the stability of underground openings subjected to dynamic loading  
A. Mortazavi, Department of Mining and Metallurgical Engineering, Amirkabir University of Technology, Iran

239  Hydraulic fracturing for in situ stress measurements – a simulation and experimental study  
V. Rasouli, Department of Petroleum Engineering, Curtin University, Australia

247  High-resolution fracture recognition from seismic data – applying oil and gas technology to mining  
R.H.J. Oppermann, OPPtimal Exploration and Development Pty Ltd, Australia

Planning and design

259  Keynote Address: Where do the data come from?  
J. Hadjigeorgiou, Lassonde Institute of Mining, University of Toronto, Canada

279  The design and construction of water impounding plugs using sprayed concrete  
U. Singh, Stratacrete Pty Ltd, Australia; P. Abraham, E. Bellamy, A. Swart, Newcrest Mining Ltd, Australia

297  Challenges in multiple sill pillar mining at Vale’s Coleman Mine  
O.N.S. Beruar, M. Yao, A. Sampson-Forsythe, Vale Canada, Canada

Fundamental rock mechanics

313  Absolute, relative and intrinsic rock brittleness at compression  
B.G. Tarasov, Centre for Offshore Foundation Systems, The University of Western Australia, Australia; Y. Potvin, Australian Centre for Geomechanics, The University of Western Australia, Australia

325  System of trustworthy deformational precursors of highly stressed rock samples failure  
V.V. Makarov, L.S. Ksendzenko, V.V. Gnitenko, A.M. Golosov, N.A. Opanasiuk, A.A. Opanasiuk, Far Eastern Federal University, Russia

339  Non-Euclidean model for description of rock  
M.A. Guzev, Institute for Applied Mathematics, Far Eastern Branch of the Russian Academy of Sciences; Far Eastern Federal University, Russia

Numerical modelling

347  Visualisation of elastic numerical modelling results for effective mine planning and design  
K. du Plooy, SRK Consulting, Australia; F. Basson, Newmont Asia Pacific, Australia

357  Numerical analysis of alternative mining sequences to minimise the potential for fault slip rockbursting  
J. Sjöberg, F. Perman, Itasca Consultants AB, Sweden; C. Quinetro, L. Malmgren, C. Dahnér-Lindkvist, M. Boskovic, LKAB, Sweden

373  Explicit discontinuum simulation for probabilistic forecasting of fault slip and rock mass seismic potential  
D. Beck, Beck Engineering Pty Ltd, Australia; V. Levkovitch, Beck Engineering, Germany; B. Simser, Xstrata Nickel Ltd., Canada

389  Application of the limit equilibrium strength to the seismic assessment of shear related seismicity  
J. Jarufe Troncoso, Codelco VP Chile, Chile; and The University of Western Australia, Australia; Y. Potvin, J. Wesseloo, Australian Centre for Geomechanics, The University of Western Australia, Australia
Caving methods

415 Numerical analysis of stress field distribution and blasting-induced rockburst at Hongtoushan Copper Mine
X.D. Zhao, College of Resources and Civil Engineering, Northeastern University, China; and State Key Laboratory for Geomechanics and Deep Underground Engineering, China University of Mining and Technology, China; J. Liu, College of Resources and Civil Engineering, Northeastern University, China

431 How does a caved rock mass behave under confined gravity flow?
M.A. Fuenzalida, R.L. Castro, Mining Engineering Department and Advanced Mining Technology Center, University of Chile, Chile

443 Finding zones of stress concentrations and seismic events in deep ore mining affected by high horizontal stresses
V.A. Eremenko, A.A. Eremenko, L.N. Gakhova, I.V. Klishin, Institute of Mining, Siberian Branch, Russian Academy of Sciences, Russia

Ventilation

453 Energy management of refrigeration systems within deep mines in South Africa
R. Wilson, S. Bluhm, L. van den Berg, BBE Consulting, South Africa

463 Refrigeration and cooling system design – a case study
W. Marx, M. Bezuidenhout, BBE Consulting, South Africa; L. van den Berg, BBE Consulting, South Africa; and Snowden Mining Industry Consultants, Australia; P. Botha, G. Meredith, Palabora Mining Company Ltd, South Africa

Drilling technology

475 Adapting oil and gas downhole motors for deep mineral exploration drilling
A. Mokaramian, V. Rasouli, Department of Petroleum Engineering, Curtin University; and Deep Exploration Technologies CRC, Australia; G. Cavanough, CSIRO, Queensland Centre for Advanced Technologies; and Deep Exploration Technologies CRC, Australia

487 A feasibility study on adopting coiled tubing drilling technology for deep hard rock mining exploration
A. Mokaramian, V. Rasouli, Department of Petroleum Engineering, Curtin University; and Deep Exploration Technologies CRC, Australia; G. Cavanough, CSIRO, Queensland Centre for Advanced Technologies; and Deep Exploration Technologies CRC, Australia
