Plenary Sessions

Keynote Address
Post-Mining Landforms — Engineering a Biological System .............................................. 3
A.B. Fourie, M. Tibbett

Global Review and Cost Comparison of Conventional and Phyto-Technologies for Mine Closure ................................................. 13
I.M. Weiersbye

Ageing Effects in Seismic Behaviour of Closed Tailings Deposits ............................................. 31
J.H. Troncoso, E. García

Experience of Canadian Partnership Programs — MEND and NOAMI ........................................... 43
G. Tremblay, C. Hogan

The El Indio Mine Closure — A Significant Environmental Accomplishment .............................................. 53
M. Robledo, J. Meyer

Legal and Regulatory Requirements

Mine Closure — A Regulators Guide to the Things that Matter ................................................ 69
D.R. Welsh

Mine Closure — Legal, Social and Environmental Aspects in Brazil ......................................... 79
J.C.C. Flores, H.M. Lima, H. Herrmann

South African Legislation Pertinent to Gold Mine Closure and Residual Risk ........................................ 89
M.W. Sutton, I.M. Weiersbye

Western Australian Regulatory Approach to Mining Approvals and Mine Closure ........................................... 103
G. Cobby

The Role of the Golden Gecko Awards in Enhancing Mine Closure ........................................ 107
D. Risbey, G. Cobby

Abandoned Mines in Peru — Prioritization of Environmental Remediation ........................................... 111
M.G. Rankin, A. Almenara, A. Rodriguez, G.A. Tremblay

Social Issues

Social Issues Related to the Closures of Underground Coal Mines in the Czech Republic ................................. 123
J. Dvořáček

Influence of Socio-Environmental Factors on Future Closure Plans .............................................. 129
M. Weber, W. Brandt

Getting Social Impact Assessment Right — Minimising Project Risk and Maximising Sustainable Outcomes ................................. 139
K. Ferguson

Vandals or Entrepreneurs? Acknowledging and Managing the Human Factor During Mine Closure in the Developing World Context ........................................ 145
M.T. Reichardt, C.L. Reichardt

Criteria for Closure

Developing Completion Criteria for Alcoa’s Bauxite Mine Rehabilitation in Western Australia — An Iterative Process ........ 155
C.D. Grant

Mine Closure 2007, Santiago, Chile
A Risk Assessment Approach for Comparing Mine Rehabilitation and Closure Options at Coal Mines in Central Queensland, Australia ................................................................. 167
D. Welsh, A. Blanco, P. Roe

MRPP — The French Prevention Procedure to Manage Post-Mining Hazards .................................................. 179
C. Didier, X. Daupley

Development of Mine Site Close-Out Criteria for Arsenic and Lead Using a Health Risk Approach.................... 191
V. Diacomanolis, J.C. Ng, B.N. Noller

Closure — The Most Tangible Indicator of Sustainable Development for the Mining Industry; Rio Tinto’s Approach ........................................................................................................................................ 199
M.C. Moller, R. Flugge, S. Anstee

Mine Closure Management Guidelines for Codelco ............................................................................................ 207
I. Marshall, M.F. Dominguez

Completion Criteria for Rehabilitated Forest Ecosystems on Mined Land — Should They be Based on Unmined Reference Sites? ........................................................................................................ 211
P.D. Erskine, D.R. Mulligan, M.F. Olsen, B. Kirsch, P. Roe

Mine Life Cycle Systems Models and Integrated Mine Closure for Sustainability .................................................. 217
D.J.A. van Zyl, M. Scoble, G.W. Wilson

Mine Closure Risk and Decision Analysis ......................................................................................................... 225
R.B. Logan, D.P. Murphy, C.A. Beale

Mine Closure Planning

Revitalisation of the Allotment of Underground Mine below the Ground and on the Surface — Application to the Jan Sverma Mine in Zacler, Czech Republic .................................................................................................................. 237
Z. Adamec, K. Novotný, I. Rakouš, T. Tsivovský, J. Votoček, V. Slivka, V. Petroš

GIS-Based 3-D Analysis and Visualisation Tools — An Example in Advanced Planning for Mine Closure, Hunter Valley, Australia ........................................................................................................ 247
M. Andrews, A. McMullen, S. Grimshaw

Methodology for the Strategic Assessment of Mine Closure Options ......................................................................... 253
S.A.P. Brown, B. Randell

Reconstituted Soils — A Probabilistic Approach to Resolve Aspects Relating to the Sustainability and Economic Viability of the Rehabilitation of Mined Lands ................................................................. 261
R. Hattingh, H. Kotze, C. Linstrom, R. Krantz, C. Viljoen, N. Jovanovic

Ferrous Mine Closure Planning in Caroni Basin, Venezuela .................................................................................. 273
Y.A. Blanco, A.J. Castillo, Z. Andara

Strategies and Technologies for Early Mine Closure Planning ............................................................................... 283
K.J. Lang, J.W. Rowe, B.C. Johnson, J. Harrington, R. McKittrick

Planning for Closure as Part of Project Approval .................................................................................................. 289
S. Grimshaw

Closure Planning and Implementation at CVRD Inco’s Whistle Mine, Ontario, Canada ........................................ 301
B. Ayres, M. O’Kane, L. Lanteigne, Q. Smith

Methodological Proposal to Incorporate the Environmental Dimension in the Development of Conceptual Mine Closure Plans .................................................................................................................................... 313
M. Quiroz

GIS — A Tool to Plan and Update Mine Closure Planning .................................................................................... 325
K. Leal, K. Viveros, P. Paolini

Challenges for Codelco, Salvador Division, in the Development of a Closure Plan and Productive Reconversion Project ............................................................................................................................. 335
## Costs and Financing

Demolition — The Forgotten Closure Strategy ................................................................. 347  
*D.P. Murphy, G. Duff, R.C. Marshall*

Incorporation of the Environmental Costs in Open Pit Mine Design for Closure ................................................. 357  
*G.D. Ramírez-Rodríguez, T.G. Rozgonyi*

Progressive Reduction of Liabilities and Recovery of Financial Sureties in Recognition of Successful Rehabilitation in Western Australia .................................................. 365  
*S. Mackenzie, D. Jasper, H.W.B. Lacy, B. Bow*

*J. Jarosz*

Costs of Mine Closure — Learning from the Past ......................................................................................... 383  
*L. Wilde*

A New Model for Estimation of Mine Closure Costs ......................................................................................... 393  
*A. Peralta-Romero, K. Dagdelen*

### Mine Site Reclamation and Rehabilitation

Bioremediation of Diesel Fuel-Contaminated Desert Mining Soils in the Atacama Desert (Chile) — A Tool for Environmental Management .................................................. 407  
*A. Godoy-Faúndez, B. Antizar-Lalislao, L. Reyes-Bozo, C. Sáez-Navarrete, A. Camaño-Moreno*

Mine Closure — The State-of-the-Art in Minas Gerais, Brazil ................................................................. 413  
*H.M. Lima, M.F. Cunha, D. Barcellos*

Coordinating Research and Practice in Oil Sands Mine Reclamation .......................................................... 425  
*V.R. Wilson, J.R. Gulley, H.B. Anderson, W. Tedder*

Beating the Budget — Case Study of Closure of Rietspruit Mine, South Africa ................................................. 431  
*C.A. van Renssen*

### Revegetation and Phytostabilisation

Sustainable Revegetation of Arsenic-Rich Gold Mine Tailings in the Victorian Goldfields, Australia — Using High Value Eucalyptus Trees and Indigenous Grasses ................................................................. 443  
*A.I. Doronila, A.J.M. Baker, R.J. Watkins*

Effect of Amendment C:N Ratio on Plant Diversity, Cover and Metal Content for Pb and Zn Mine Tailings in Leadville, Colorado, USA ................................................................. 453  
*S. Brown, C. Henry, P. DeVolder*

Generating Carbon Credits through Mine Site Restoration with Organic Amendments ................................................. 459  
*S. Brown, S. Subler*

Sustainable Rehabilitation of Copper/Gold Mine Tailings in Chile through Phytostabilisation — More than Plants ................................................................. 465  
*R. Ginocchio, C. Santibáñez, P. León-Lobos, S. Brown, A.J.M. Baker*

The Importance of Microbial Activity for Sustainable Rehabilitation of Copper Mine Tailings ................................................. 475  
*C. Santibáñez, J.L. Romero, A. Arochas, P. Medina, R. Ginocchio*

The Engineering Contribution of Vegetation to the Stability of Cover Systems ................................................. 483  
*A.B. Fourie*

Reforestation of Areas Degraded by Informal Sector Mining in Madre de Dios Forest, Peru ................................................. 495  
*J.A. Vidalón*
Water and Acid Water Management

Utilisation of Mine Waters from Closed and Flooded Underground Uranium Mines as a Secondary Source of Uranium .......................... 509
B. Michálek, A. Hájek, N. Rapantová, A. Ormela

Strategies for Reducing Seepage from Surface Waste Rock Piles During Operation and Post-Closure................................. 521
D.J. Williams, T.K. Rohde

Strategies for Reducing Seepage from Surface Tailings Storage Facilities during Operation and Post-Closure.................. 533
D.J. Williams

Rehabilitation of Lake Yanamate, Cerro De Pasco, Peru ................................................................................................................. 543
J.A. Vidalón, G. Dalla Porta

Water Treatment and Management during the Closure of the Colomac Mine .................................................................................. 553
J.T. Chapman, W. Coedy, S. Schultz, M. Rykaart

Copper Heap Leaching Operations — Understanding and Managing the Processes to Reduce Long-Term Environmental Liabilities .................................................................................................................. 565
S. Rivera, A. Ramirez, P. Pinto, J. Rosales, C. Gonzalez

Handling of Copper Leachate Produced after the Cessation of Mining Operations............................................................ 571
R.E. Dixon, C.A. Garcia, I.D. Ewart

Natural Attenuation as a Method of Effluent Management for Closed Mine Facilities ................................................................. 577
J. McCartney, J. Chahbandour, G. Beale

Adaptive Remediation of a Fine-Grained Borrow Pit in Canada’s North .......................................................................................... 583
J. Cassie, G. Claypool, E. Pike

Emergency Treatment of Acid Mine Drainage at the Leviathan Mine with the Rotating Cylinder Treatment System .......................................................................................................................... 593
T.K. Tsukamoto, F. Vasquez

Morro do Ouro Pit Lake Water Quality Prediction ......................................................................................................................... 603
J.A.M. Esper, R.D. Amaral, D. Banton, R. Verburg

Current Trends in Heap Leach Facility Closure in Nevada — Emphasis on Draindown .................................................................... 613
R.J. Frechette

Achieving Mine Closure and Lease Surrender in North Queensland, Australia — A Case Study .......................................................... 619
J. Grounds, T. Payne, W.J. Haylock

Mine Waste Management and Cover Design

Cover System Design and Testing for Pierina Mine, Ancash, Peru ................................................................................................. 633
G. Zhan, W. Baumann, M.A. Milczarek, T-M. Yao, R.C. Rice

Impacts of Vegetation on Soil Cover Performance .......................................................................................................................... 645
B.E. Wickland, J. Hull, E. Pike, G.W. Wilson

Geotechnical Materials and Wood Wastes for Embankment Stabilisation of Tailing Storage Facilities ........................................ 655
T. Worthington, M.F. Brainbridge, S. Vlahos, N. Amoah, M. Tibbett

Practical Considerations for Choosing Covers for Suphidic Tailings Areas .................................................................................. 665
K.A. Bocking, K.J. DeVos, M. Butler

Accessing Cover System Performance — A Hillslope Hydrology Approach ................................................................................. 673

Evaporation and the Water Balance for Sloped Covers on Mining Wastes .................................................................................. 683
B. Weeks, G.W. Wilson

Results after One Year Monitoring of a Field-Scale Experiment for Evaluating the Performance of Covers Constructed of Paste Rock Material in Copper Cliff, Ontario, Canada ........................................................................... 689
J. Miskolczi, G.W. Wilson
