Table of Contents — Volume 2

Regulatory Issues in Mine Closure Planning and Transfer of Care and Custody

Mine relinquishment – processes and learnings .................................................. 3
H. Butler, G.M. Bentel

Alberta mine reclamation and abandonment requirements .................................. 13
R.H. Houlihan, C.E. Hale

A guidance document for mine closure and management of long-term liabilities – examining a policy framework in Canada
R. Holmes, G. Stewart

Three “R’s” for mine closure – responsibilities, regulations and results .................. 29
H. Jones

Improving the legislative framework for mine closure in Western Australia .................. 39
X. Nguyen

Regulatory requirements for reclamation and closure planning at Alberta’s oil sands mines .................. 47
T.C. Richens, B.G. Purdy

Mine Closure Risks and Liability

A risk-based approach to closure planning .......................................................... 59
G. Byrne

Mine closure risks – from a financial institution’s perspective .................................. 69
T.A. Lwin

Review of 2010 financial security at Equity Silver Mine .................................................. 79
W.A. Price, M. Aziz, K. Bellefontaine

Managing the closure process with an effective safety, health and environmental management system .................. 87
L. Tesch, J. Kinsella, K.D. Burke

Financing Closure

The “smoking gun” of detailed mine closure cost over-run – a review using case studies of the real costs associated with the demolition and removal of infrastructure in mine closure
D. Fletcher, A. Hutton, C. Dick

Alberta’s mine financial security programme .................................................. 107
C. Powter, O. Kotelko, B. Anderson, D. Brand, L. DiMarzo
Corporate Social Responsibility

Leaving a legacy – global results and lessons learned ................................................................. 119
C. Dow Baker, S. Curry

Corporate social responsibility and mine closure in Ghana, West Africa ........................................ 129
M. Thorpe

Planning for successful mine closure – the earlier, the better ..................................................... 139
D.S. Tubino, M.C. Fonseca

Community Engagement in Mine Closure

Life of coal mine planning – engaging in land use planning at Luscar and Gregg River Mines .................. 147
S. Karmacharya, M. Symbaluk, D. Brand, S. Schwartz

A multi-stakeholder approach for developing mine reclamation guidelines ........................................ 157
T.C. Richens, S.P. Tuttle

Reaching economic and social prosperity – a need to collaborate with communities through commodity cycles to post-closure ................................................................. 167
J.A. Shandro, A. Ostry, M. Scoble, D. Van Zyl

Building relationships and capacity with First Nation communities affected by mine closure ................. 177
W. Slater, R. Moor, J. Lemieux-Tremblay

Building stakeholder engagement in sustainable solutions – the strategic advisory panel on selenium management ................................................................. 189
S. Swanson, R. Abbott, W. Funk, L. Kirk, G. Mckenna, H. Ohlendorf, T. Sandy

Monitoring after Mine Closure

Full-scale sulphate-reducing bioreactor at the Iron King/Copper Chief Mine, USA ................................. 199
R.J. Buchanan, Jr., J.J. Gusek, D. Sorells, M. Madden

Land-use planning following resource extraction – lessons from grizzly bears at reclaimed and active open pit mines ................................................................. 207
B. Cristescu, G.B. Stenhouse, M. Symbaluk, M.S. Boyce

Developing an operation, maintenance and surveillance manual for the post-closure management of tailings facilities ................................................................. 219
C. Crossley, B. Russell, D. van Zyl, G. McKenna

Early successional wildlife monitoring on reclamation plots in the Athabasca oil sands region .................. 229
V.C. Hawkes

Stable isotope profiling for estimation of net percolation through a reclaimed overburden dump .................. 239
J.N. Hilderman, S.L. Barbour, M.J. Hendry

Monitoring of the geochemical evolution of waste rock facilities at Newmont’s Phoenix Mine .................. 251
J.M. Keller, L.T. Busker, M.A. Milczarek, R.C. Rice, M.A. Williamson

Whitewood Mine closure ............................................................................................................... 261

Evaluating the performance of a high density polyethylene lined cover system at the reclaimed Franklin Mine near Sydney, Canada ................................................................. 269
G. Meiers, M. O’Kane, D. Mayich
Final results for the Morenci tailings experimental reclamation plots .............................................................. 281
M.A. Milczarek, F.M. Steward, W.B. Word, M.M. Buchanan, J.M. Keller

Monitoring after mine remediation – planning considerations and lessons learned in northern Canada ................. 293
E. Pike

Improving fish habitat productivity through controlled dam removals and fishway construction as .................. 301
part of a reclamation plan
F. Plante, M. Clément, D. Caissie

Post decommissioning monitoring of eleven uranium mines – the development of an integrated .................... 309
and adaptive environmental monitoring programme to address multiple sites over time
C.K. Russel, P.L. Orr, D. Berthelot, I. Ludgate

Beaverlodge uranium mine closure – balancing current expectations with past practices ............................ 319
M. Webster

Long-term Surface and Ground Water Management

Multi-year assessment of water and energy exchange from an oil sands reclamation cover, Fort .......................... 331
McMurray, Canada
S.K. Carey

Acid rock drainage source control opportunities at the Red Dog Zinc and Lead Mine, USA ............................... 341
J.L. Clark, D. Christensen, B. Lum

Closure considerations while operating a tailings management facility in northern Ontario, Canada .................... 349
R. Donato

Climate-scaled water balance development for mine closure planning ................................................................. 357
C.J.D. Fraser, A.J. Martin, T.F. Pedersen

Long-term post-closure surface water and groundwater risk management and subsequent water quality trends at the former Sullivan Mine, Canada ................................................................. 367
S.A. Humphries, D.G. Thomson, M.L. Unger

An integrated, risk-based approach for design of mine waste long-term disposal facilities ............................ 377
A. Steel, K. Hawboldt, F. Khan

Groundwater flow and solute transport modelling of an oil sands mine to aid in the assessment ........................ 389
of the performance of the planned closure landscape
R.L. Thompson, R.B. Mooder, M.J.W. Conlan, T.J. Cheema

Recent Mine Closure Case Studies

Best practice in acquiring a mine closure certificate – a critical analysis of the De Beers Oaks Diamond ............... 401
Mine, South Africa
N.D. Botham, C.J. Kelso, H.J. Annegarn

Closure of the Colomac Mine tailings containment area ....................................................................................... 411
R. Breadmore, W. Coedy

Reclamation of the Silver Bell tailings impoundment, San Juan Mountains, USA ............................................ 421
C.L. Foulk, J.L. Tucker, R.T. Jakubowski

Faro Mine remediation project – an overview ........................................................................................................ 433
S.P. Mead
Louvicourt Mine – a recent mine closure case study ................................................................. 441
R. Ouellet, M.P. Filion, M. Edwards, G.W. Davies

Revegetation at the Sullivan Mine – research to closure – a case study ...................................... 451
J.E. Przeczek, D. Ryder

San Martin Mine in Honduras – from closure to sustainability .................................................... 461
C.F. Roldan, D. Purvance

Five years to the end – planning the closure of Rio Tinto's Blair Athol coal mine ......................... 471
D. Springer

Closing out gold mining legacies in the Porcupine Camp ........................................................... 479
T.M. Sulatycky, L. Götz, D. Bucar, R. Taillefer

Former Clinton Creek asbestos mine ........................................................................................... 489
T.R. Wingrove, G. Robinson, R. Aslund, B.W. Hartshorne

Mine closure in China – problems, strategies and forecasts ....................................................... 501

A new best practice approach for mine closure in the tropics .................................................... 511
H.D. Smith

Beneficial Re-use of Mine Sites

Beneficial and award-winning re-use of a quarry site – landform design for sustainable closure ........................................ 523
M. Gerner, J.M. Southwood, J. Buckley

Brown to green – developing a solar project and cover study on a mine tailings facility .................... 533
C. Gulde, A. Wagner, E. Koch, K. DeBoer, P. Martin

Guidelines for cerrado establishment on open pit mine sites – Paracatu, Brazil ...................................... 541
N. Slingerland, S. Kelly, K. Landman

Assessing soil carbon storage and climate change mitigation in biosolids mine reclamation projects .................................................. 551
A. Trlica, M. Teshima

Exploring alternative energy options for mine sites ........................................................................ 559
P.H. Whitbread-Abrutat, N.J. Coppin

Author Index .................................................................................................................................... 569
